Register for the MACD Virtual Convention [HERE]

MACD Virtual Convention, Monday - Friday, December 14-18

---

**MONDAY, DECEMBER 14**

**Release of Recorded Sessions, 8:00 AM**
- Event Welcome Message
- Show Me the Money

**Live Presentations**
- 9:00 - 10:00 AM - Manager Forum: Making it Happen - using volunteers to further the work of your CD
- 10:30 - 12:00 PM - Conservation Connections *(1.5 Hour Session)*
- 1:00 - 2:00 PM - Native Grass and Pollinator Plantings from a Forester’s Perspective *(Required - FAP)*
- 1:00 - 2:00 PM - Hunter Access Program (HAP) Update - what is the future?
- 3:00 - 4:30 PM - MAEAP Program Update & Database Demo *(1.5 Hour Session)* *(Required - MAEAP)*

---

**TUESDAY, DECEMBER 15**

**Release of Recorded Sessions, 8:00 AM**
- CTAI Program Update *(Required - CTAI)*
- Cleaning and Sanitizing Concepts for Fresh Produce and Equipment *(Required - Food Safety)*
- Forestry and Climate Change *(Required - FAP)*

**Live Presentations**
- 9:00 - 10:00 AM - Manager Forum: Planning Your CD’s Future: - Developing a Natural Resource Assessment
- 10:30 - 11:30 AM - CTAI Practice Standard Update and Q&A *(Required - CTAI)*
- 10:30 - 11:30 AM - Part 1 of 2: System Stressors: High Great Lakes Levels & Record Wetness *(Required - FAP)*
- 1:00 - 2:00 PM - Part 2 of 2 System Stressors: High Great Lakes Levels and Record Wetness – A Conversation
- 3:00 - 4:00 PM - MAEAP Tech Roundtable: Challenges & Opportunities with COVID-19 *(Required - MAEAP)*
- 3:00 - 4:00 PM - MSUE Manure Management Web-based Tools
WEDNESDAY, DECEMBER 16

Release of Recorded Sessions, 8:00 AM

- How to Create Financial Statements for Managers
- Director’s Roles and Responsibilities
- Livestock Screening Tool and Mapping (Required - MAEP)
- Poultry 101 (Required - MAEP)

Live Presentations

9:00 - 10:00 AM - Manager Forum: How did COVID affect your 2020 Tree Sale?
10:30 - 11:30 AM - Part 1 of 2: CTAI Emergency Watershed Program (Required - CTAI MAEAP)
10:30 - 11:30 AM - Preparing for Spotted Lanternfly
1:00 - 2:00 PM - Part 2 of 2: CTAI Emergency Watershed Program (Required - CTAI, MAEAP)
1:00 - 2:00 PM - Michigan Septic Code Update
3:00 - 4:00 PM - We’re All Connected By Water
3:00 - 4:00 PM - How to Create and Read Financial Statements for Managers - Live Q&A - Bring Your Reports!

THURSDAY, DECEMBER 17

Release of Recorded Sessions, 8:00 AM

- Water Systems for Fresh Produce Production: wells, hydrants and backflow, oh my!
- Farm Stress and Suicide Prevention
- Engaging River Raisin Farmers in a Sub-surface Water Monitoring Program: a look into applicability, efficacy, and need

Live Presentations

9:00 - 10:00 AM - Manager Forum: Director Recruitment and Retention
10:30 - 11:30 AM - Fruit and Vegetable Wash Water with Speaker Panel Q&A
1:00 - 2:30 PM - A Social Conversation for Program Ambassadors (1.5 Hour Session)
1:00 - 2:00 PM - CRP Prairie Strip Practices
3:00 - 4:00 PM - The Endangered Species Act and Ecologically Sustainable Forests (Required - FAP)

FRIDAY, DECEMBER 18

Live Presentations

9:00 AM - 10:00 AM - Preserve Where We Conserve: the vital role of CDs in permanent farmland protection
9:00 AM - 10:00 AM - Soil Health Legislation
10:45 AM - 12:00 PM - Manager Forum - Conclusion and Resources from Monday-Thursday Sessions
10:45 AM - 12:00 PM - Director Forum

REGISTER TODAY!

Virtual Convention

- MACD Members = $100 per person
- MACD Partners and Guests = $150 per person

REGISTER HERE
EVENT DESCRIPTIONS

ANNUAL ASSEMBLY MEETING
Tuesday, December 8th, 9:00 AM - 12:00 PM
The annual assembly meeting of MACD’s membership will be held virtually on Tuesday, December 8th, beginning at 9:00 AM. There is no cost to attend this meeting. Members and guests are asked to register for planning purposes.
Member Conservation Districts: Please designate a board member to cast votes on behalf of your District. One designated board member per District. This individual will make this designation when registering.

VIRTUAL CONVENTION SESSIONS
Monday, December 14
RECORDED SESSIONS
Event Welcome Message
Description: Join Michigan Conservation Partnership leaders for the MACD 2020 Virtual Convention welcome message.
Presenters: Gerald Miller, MACD President, Garry Lee, NRCS State Conservationist; Gary McDowell, MDARD Director; and Melissa Eldridge, CDEM President
Show Me the Money
Description: A sustainable Conservation District depends in part, on a balance of revenue sources. Learn the basics and how to acquire sufficient revenue to ensure the sustainability and high performance of your District.
Presenter: Patrice Martin, Vice President, Innovative Community Solutions

LIVE PRESENTATIONS
9:00 - 10:00 AM - Manager Forum: Making it Happen - using volunteers to further the work of your CD
Description: This facilitated session will provide District Managers the opportunity to discuss how to harness the value of volunteers to further your district’s work. Come prepared to share your experience in recruiting, scheduling, and using volunteers.
Note-taker: Renee Penny, Conservation Specialist, Kalkaska Conservation District
Facilitator: Christy Roman, Regional Coordinator, MDARD

10:30 - 12:00 PM - Conservation Connections (1.5 Hour Session)
Description: Learn about 6 of the lesser known Conservation Districts programs that are in your Tool Box! The Michigan On-Farm Produce Safety program, the Forestry Assistance program, Cooperative Invasive Species Management Areas (CISMA), Watershed Technicians, the Phosphorus Initiative, and the Conservation Technical Assistance Initiative (CTAI). Hear from the program managers and technicians about their program including why it was developed, the resource concerns are addressed, the positive impacts it has in their communities, and how Districts both contribute and benefit.
Presenters: Albert Jones, Area Conservationist, NRCS; Emily Hale, Produce Safety Technician, Blue Water Conservation District; Ben Schram, FAP Program Coordinator, MDARD; Ryan Wheeler, Terrestrial Invasive Species Biologist, MDNR; Brian Talsma, Watershed Technician, Allegan Conservation District; and Laura Doud P.E., Environmental Engineer, MDARD
Monday, December 14. continued

LIVE PRESENTATIONS

1:00 - 2:00 PM - Native Grass and Pollinator Plantings from a Forester's Perspective *(Required: FAP)*
Description: This session will showcase how to improve non-forested habitats by planting native wildflowers and grasses, as a way to "complement the forest". In this presentation, Josh Shields, Forester with the Manistee Conservation District will discuss how to convert low-quality habitat (such as fields dominated by non-native invasive species) to higher quality habitat dominated by native wildflowers and grasses that benefit numerous species of wildlife, including pollinators. In addition, how to select a site, site preparation methods (mechanical, chemical, and solarization), plant species selection, planting season, seeding rates, planting methods (hand seeding, no-till drill), and post-planting practices will be discussed.
Presenter: Josh Shields PhD, Forester, Manistee Conservation District

1:00 - 2:00 PM - Hunter Access Program (HAP) Update - what is the future?
Description: Join Mike Parker for an update on the Hunter Access Program and learn what is in the future for this great program.
Presenter: Mike Parker, Conservation Partners Program Specialist, MDNR

3:00 - 4:30 PM - MAEAP Program Update & Database Demo *(1.5 Hour Session) (Required: MAEAP)*
Description: Hear from the program manager about program updates and annual awards. Hear from Jason Lantz about the new MAEAP database. Hear from Meridith Smith about MAEAP communications efforts. Hear from Josh Appleby about the A*Syst updates.
Presenters: Joe Kelpinski MAEAP Program Manager; Jason Lantz, PMP, PMI-ACP IT Project Manager at Kunz, Leigh & Associates; Meridith Smith, MAEAP Communications; and Josh Appleby MAEAP Verifier

Tuesday, December 15

RECORDED SESSIONS

CTAI Program Update *(Required - CTAI)*
Description: An update on the CTAI program, including where we are with the program and what FY21 may bring!
Presenter: Laura Doud P.E., Environmental Engineer, MDARD

Cleaning and Sanitizing Concepts for Fresh Produce and Equipment
Description: Cleaning and sanitizing are essential for safe fruit and vegetable production. This presentation will give you a framework to determine what a grower might need in terms of cleaning and sanitizing as well as support for deciding what sanitizer is right for the grower’s needs.
Presenter: Phil Tocco, Extension Educator MSUE

Forestry and Climate Change *(Required - FAP)*
Description: Join Stephen Hander and Lauren Cooper for a discussion on climate change and forestry. Stephen’s presentation will cover an overview of observed and projected climate trends, as well as some new tools and resources to help foresters consider site-level conditions and develop adaptation plans. Lauren will cover “Forest Carbon 101”, as well as a policy overview, including some fundamental policy mechanisms, the US Climate Alliance, Natural and Working Lands, and carbon neutrality in Michigan.
Presenters: Steven Handler, Climate Change Specialist, USFS, and Lauren Cooper, Academic Specialist, Forest Carbon Curriculum, MSU
Tuesday, December 15, continued

LIVE PRESENTATIONS

9:00 - 10:00 AM - Manager Forum: Planning Your CD’s Future - Developing a Natural Resource Assessment
Description: This session is a facilitated discussion for District Managers on how to develop a resource assessment, where to find the MACD templates, and what resources are available to develop the assessment. Come prepared to share your experience.
Note-taker: Michelle Beloskur, Executive Director, Ingham Conservation District
Facilitator: Christy Roman, Regional Coordinator, MDARD

10:30 - 11:30 AM - CTAI Practice Standard Update and Q&A (Required: CTAI)
Description: Learn about program changes to the NRCS Practice Standards followed by a live A&A on the changes as well as any questions regarding the CTAI program from MDARD staff.
Presenters: Dan Vasher, Civil Engineer, NRCS; Laura Doud P.E., Environmental Engineer, MDARD

10:30 - 11:30 AM - Part 1 of 2: System Stressors: High Great Lakes Levels and Record Wetness (Required: FAP)
Description: Join Mark Breederland for a conversation about high Great Lakes levels and record wetness. This session includes an overview of Michigan’s coastline and a walkthrough of lake levels since 1860. Mark also discusses factors such as waves and bluff erosion, as well as some tools in the toolbox for conservationists and what we can do to move toward better coastal resiliency.
Presenter: Mark Breederland, Educator, Michigan Sea Grant Extension

1:00 - 2:00 PM - Part 2 of 2 System Stressors: High Great Lakes Levels and Record Wetness – A Conversation
Description: Join Mark Breederland for a conversation about high Great Lakes levels and record wetness. This session includes an overview of Michigan’s coastline and a walkthrough of lake levels since 1860. Mark also discusses factors such as waves and bluff erosion, as well as some tools in the toolbox for conservationists and what we can do to move toward better coastal resiliency.
Presenter: Mark Breederland, Educator, Michigan Sea Grant Extension

3:00 - 4:00 PM - MAEAP Tech Roundtable: Challenges & Opportunities Associated with COVID-19 (Required: MAEAP)
Description: This session is required for MAEAP technicians. Join in on a live discussion to share your thoughts, ideas, successes, challenges, and frustrations throughout the COVID pandemic. Bring your thoughts to the table as we discuss 1) office dynamics in a changing landscape, 2) COVID-19 impacts on connecting with producers and making field visits, and 3) promoting programs through Winter Meetings and Field Day events and what that will look like in 2021.
Facilitator: Shelby Burlew, MAEAP Verifier, MDARD

3:00 - 4:00 PM - MSUE Manure Management Web-based Tools
Description: The Computer-Assisted Nutrient Management Planning Program (CANMaPP) and the Michigan EnvirolImpact tool are support tools that facilitate conservation planning, nutrient management, and implementation activities. Technicians will learn how to utilize CANMaPP as a record keeping system based on the NRCS Nutrient Management practice standard for yield goals, fertilizers, harvest dates, and adjust the variables on an annual basis. Technicians will learn how to use the MI EnvirolImpact tool as a decision support tool for nutrient applications and help their participants make short-term application decisions based on weather forecasts, soil saturation, and soil temperatures. These tools will be helpful for both MAEAP and NRCS technicians to use with their clientele on a regular basis and something that farmers can utilize independently.
Presenters: Erica Rogers, Environmental Extension Educator, MSUE; Sarah Fronczak, Environmental Management Educator, MSUE; Connor Crank, Project Coordinator, Institute of Water Research
**RECORDED SESSIONS**

**How to Create Financial Statements for Managers** - *(Required: Watch before Live Session)*

Description: An important part of being an effective district manager is creating, reviewing, and understanding financial statements. In this recorded session Aprille will walk through how to create the financial reports managers should be using. A follow-up Q&A session scheduled for 1:00 PM on Wednesday, December 16th will answer your questions on how to create and interpret the reports in addition to helping board members understand those reports.

Presenter: Aprille Williamson, Manager, Alpena-Montmorency Conservation District

**Director's Roles and Responsibilities**

Description: Being elected as a Conservation District Director is the first step to contributing to the success of your District. Understanding the job of a Director is the next, important step. This session will cover the key roles and responsibilities of your new “job” and how to access resources for continued learning and development.

Presenter: Patrice Martin, VP Innovative Community Solutions

**Livestock Screening Tool and Mapping** *(Required: MAEP)*

Description: Kyle McCarty and Josh Appleby will walk you through mapping options for the new MAEP site screening tool. You will also hear about the latest edition and get clarification on how to best use the tool.

Presenters: Kyle McCarty, Right to Farm Program, MDARD; Josh Appleby MAEAP Verifier, MDARD

**Poultry 101** *(Required: MAEP)*

Description: Hear from MSU’s expert on poultry production in Michigan from back yard birds to large scale production. Learn fundamental terminology and production types and challenges.

Presenter: Dr. Zach Williams, Poultry Outreach Specialist, MSU Department of Animal Science

**LIVE PRESENTATIONS**

**9:00 - 10:00 AM - Manager Forum: How did COVID affect your 2020 Tree Sale?**

Description: How did COVID affect your 2020 Tree Sale? What did you do? What went well? How is your district preparing for the 2021 Tree Sale? This facilitated session will provide District Managers the opportunity to review what they learned from the 2020 tree sale and how you will apply your experience in 2021.

Note Taker: Renee Penny, Conservation Specialist, Kalkaska Conservation District

Facilitator: Christy Roman, Regional Coordinator, MDARD

**10:30 - 11:30 AM - Part 1 of 2: CTAI Emergency Watershed Program** *(Required: FAP)*

Description: Hear from the program specialist in NRCS about the mid-Michigan need for the Emergency Watershed Protection program after the dam failures earlier in 2020. The Emergency Watershed Protection program (EWP) helps communities repair environmental damage to streams, rivers, and other natural resources, caused by natural disasters such as floods and fires. It is designed to relieve imminent hazards to life and property.

Presenters: Dan Vasher, Civil Engineer, NRCS; Ruth Shafer, Water Quality Specialist, NRCS

**10:30 - 11:30 AM - Preparing for Spotted Lanternfly**

Description: Spotted Lanternfly (SLF) was first found in Pennsylvania in 2017 and has since spread to at least 8 states. Learn what the state of Michigan is doing to prepare for spotted lanternfly and what conservation districts across the state can do to prepare for SLF.

Presenter: Rob Miller, Invasive Species Prevention and Response Specialist, MDARD

**1:00 - 2:00 PM - Part 2 of 2: CTAI Emergency Watershed Program**

Description: A continuation of Part 1: Hear from the program specialist in NRCS about the mid-Michigan need for the Emergency Watershed Protection program after the dam failures earlier in 2020. The Emergency Watershed Protection program (EWP) helps communities repair environmental damage to streams, rivers, and other natural resources, caused by natural disasters such as floods and fires. It is designed to relieve imminent hazards to life and property.

Presenters: Dan Vasher, Civil Engineer, NRCS; Ruth Shafer, Water Quality Specialist, NRCS
WEDNESDAY, DECEMBER 16

LIVE PRESENTATIONS, continued

1:00 - 2:00 PM - Michigan Septic Code Update
Description: Michigan is the only state in the US that lacks a unified state septic code outlining standards and inspection protocols to ensure septic systems are operating properly. An estimated 10% of Michigan’s 1,400,000 septic systems are failing leading to millions of gallons of inadequately treated sewage discharged into Michigan’s waterways daily. In this presentation representatives from the Michigan Environmental Council will provide an update on septic ordinances and policy in Michigan and the current outlook for developing and implementing a statewide septic code.
Presenters: Tom Zimnicki, Program Director - Groundwater, Surface Water, and Agriculture, and Charlotte Jameson, Program Director Legislative Affairs, Energy and Drinking Water Policy - Michigan Environmental Council

3:00 - 4:00 PM - We’re All Connected By Water
Description: Learn about the newly updated Water Stewardship Program (MWSP) website (www.miwaterstewardship.org), which evolved in 2010 out of the Michigan Groundwater Stewardship Program. The program encourages individuals to take voluntary proactive steps to protect Michigan’s water quality – our drinking water – as well as protect our other valuable natural resources while caring for our family’s health. The new website features a ‘Water Story’ that has three characters or ‘paths’ that users can navigate. They can choose between Professor Dew, Droplette, and Trickle. Each character explores different aspects of the water cycle and will help students and adults make important connections to our water resources and why it’s important we care for them. The new website aims to remind people that we’re all connected by water and that it plays a vital role in our everyday lives - making it all that more important that we conserve our water resources.
Presenter: Hannah Reynolds, Environmental Outreach Coordinator, Eaton Conservation District

3:00 - 4:00 PM - How to Create and Read Financial Statements for Managers - Live Q&A
Description: Have questions on the recorded “How to Create Financial Statements for Managers” presentation? Join presenter, Aprille Williamson for this conversation provided as a follow-up for those who have watched the session.
Presenter: Aprille Williamson, Manager, Alpena-Montmorency Conservation District

THURSDAY, DECEMBER 17

RECORDED SESSIONS

Water Systems for Fresh Produce Production: wells, hydrants and backflow, oh my!
Description: This presentation will outline key considerations with respect to water systems that will be used for fresh produce growing, harvesting and beyond.
Presenter: Phil Tocco, Extension Educator MSUE

Farm Stress and Suicide Prevention
Description: Farming is a demanding and stressful occupation. Things such as weather, commodity prices, and machinery breakdowns are uncontrollable factors that can impact the mental health of farmers. In this session you will learn to identify signs of stress, approaches to talk to farmers under stress, suicidal indicators, and available resources.
Presenter: Eric Karbowski, Community Behavioral Health Extension Educator, MSUE

Engaging River Raisin Farmers in a Sub-surface Water Monitoring Program: a look into applicability, efficacy, and need
Description: The recently completed study titled "Engaging River Raisin Farmers in Sub-surface Water Monitoring Program", examined the implementation of a low-cost tile drain monitoring program, where subsurface water quality data was used as a feedback mechanism for increasing farmer awareness of nutrient loss issues specific to their farm. This presentation will explore the methods used for the study, its applicability and reproducibility in other areas, along with a discussion on the key learning points discovered during the participant farmer interviews.
Presenter: Alaina Nunn, Research Assistant, MSU Institute of Water Research
THURSDAY, DECEMBER 17, continued

LIVE PRESENTATIONS

9:00 - 10:00 AM - Manager Forum: Director Recruitment and Retention
Description: How do you recruit and retain district directors? A facilitated discussion for District Managers on how to recruit and retain board members. Come prepared to share!
Note-taker: Carolyn Grace, Administrator, St. Joseph County Conservation District
Facilitator: Christy Roman, Regional Coordinator, MDARD

Description: MDARD CPU staff will highlight the completed CD Operations Manual and discuss the new operational and grant progress review process.
Presenters: John Switzer, Conservation Programs Manager and Rachael Guth Regional Coordinator, MDARD

10:30 - 11:30 AM - Fruit and Vegetable Wash Water with Speaker Panel Q&A
Description: A presentation and discussion regarding EGLE requirements for produce wash water. This will include permit requirements, disposal guidelines, and a chance to get your questions answered.
Presenters: Christine Alexander, Permits Section Manager, EGLE and Kristine Rendon, Groundwater Permits Unit Supervisor, EGLE

1:00 - 2:30 PM - A Social Conversation for Program Ambassadors (1.5 Hr. Session) (Required: MAEAP)
Description: This session will walk you through the strengths and limitations of the top social media platforms and how to see, promote, and defend your work through the “social” lens. It will also discuss ways to more effectively discuss the MAEAP program with non-farming audiences to increase understanding and support of your work.
The session will also touch on:
- General Interview Techniques: Answering questions and dealing with traditional media reporters
- Showcase your work: Strategies for promoting the MAEAP program (how to’s for recognizing news, using news releases, social media posts, etc.).
- Ambush-proofing: How to know when you’re walking into an ambush and what to do before, during and after.
Presenter: Meredith Smith, Communications Representative, MDARD

1:00 - 2:00 PM - CRP Prairie Strip Practices
Description: As all farmers know, not every acre of land produces the same yield. A similar idea applies to conservation: some areas of a field or landscape yield higher conservation benefits than others. By targeting those areas that have a high conservation value, farmers and landowners can gain disproportionate environmental benefits. Research shows that by converting 10% of a crop-field to diverse, native perennial vegetation, farmers and landowners can reduce sediment movement off their field by 95 percent and total phosphorous and nitrogen lost through runoff by 90 and 85 percent, respectively. Learn more about the newest Conservation Practice 43 (CP43), Prairie Strips, designated a CLEAR practice under the Continuous Conservation Reserve Program (CCRP).
Presenters: Brian Thomas, ACEP/CRP Coordinator, NRCS and Kelly Losey, Conservation Program Specialist, FSA

3:00 - 4:00 PM - The Endangered Species Act and Ecologically Sustainable Forests (Required: FAP)
Description: Traditional approaches to forest management were developed when the global human population was a third of what it is today. Stressors like invasive species and climate change were not considered. Twenty-first century forest biodiversity challenges require a new working model. This presentation will address biodiversity and ecological sustainability in Michigan’s forests. First, we address the stated purpose of the Endangered Species Act (ESA) of 1973 (as amended): “to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved …” Additionally, the habitat needs of wildlife species including the Kirtland’s Warbler (Setophaga kirtlandii) and Northern Long-eared Bat (Myotis septentrionalis) will be presented. Finally, we’ll discuss findings from related forest habitat management research, and consider specific ways for integrating it into forest planning and management.
Presenter: Dr. Greg Corace, Forester, Alpena Montmorency Conservation District
FRIDAY, DECEMBER 18

LIVE PRESENTATIONS

9:00 AM - 10:00 AM - Preserve Where We Conserve: the vital role of CDs in permanent farmland protection
Description: Conservation Districts are a direct conduit to private farm and forest land owners. CD staff spend months and years building relationships with these landowners so that conversation practices can be put in place to improve water quality, soil health, and many other natural resource attributes. Wouldn’t it be wonderful to know that those practices were installed on land that will remain agricultural permanently, with no threat of development? Learn how the use of agricultural easements can increase the impact of the conservation practices that take so much time and effort to put into place, and who can help you put easements in place.
Presenters: Becky Huttenga, Ottawa County Economic Development Coordinator; Brian Thomas, ACEP/CRP Coordinator, NRCS; Cris Coffin, Director of National Agricultural Land Network and Senior Policy Advisor, American Farmland Trust; Laura Rigan, Farmland Protection Specialist, Grand Traverse Regional Land Conservancy; Elizabeth Brost, Conservation Easement Coordinator, Acting Farmland Preservation Program Manager, MDARD

9:00 AM - 10:00 AM - Soil Health Legislation
Description: coming soon
Presenter: Steven Keleti, Healthy Soil Legislation Expert

10:45 AM - 12:00 PM - Manager Forum - Conclusion and Resources from Monday-Thursday Sessions
Description: Bringing it all together. A review of the highlights from each of the forums. This session will also share other lessons from the convention.
Facilitator: Christy Roman, Regional Coordinator, MDARD

10:45AM - 12:00 PM - Director Forum
Description: MACD Leadership will lead a conversation with Conservation District board members from across Michigan. This open facilitated discussion will provide the opportunity for directors to ask questions and discuss issues of importance.
Facilitator: Elaine Brown, Vice President, MACD
